

West

By Carys Davies

When Cy Bellman, American settler and widowed father of Bess, reads in the newspaper that huge ancient bones have been discovered in a Kentucky swamp, he leaves his small Pennsylvania farm and young daughter to find out if the rumours are true: that the giant monsters are still alive, and roam the uncharted wilderness beyond the Mississippi River.

West is the story of Bellman's journey and of Bess, waiting at home for her father to return. Written with compassionate tenderness and magical thinking, it explores the courage of conviction, the transformative power of grief, the desire for

knowledge and the pull of home, from an exceptionally talented and original British writer. It is a radiant and timeless epic-in-miniature, an eerie, electric monument to possibility.

Discussion Questions

1. In this book, Cy leaves everything behind to go on an expedition to see the ancient bones of giant monsters. Is there anything that fascinates you enough that you would go on an expedition to see?

2. Despite the size of Cy's journey, the book itself is very short. Were there any parts that you would have liked the writer to explore more?

3. Cy's daughter, Bess, is only 10 years old, but has to grow up very quickly. What did you make to Bess' own journey?

4. If there was a sequel to this book and it was Bess' turn to travel, where would you like to see her go?
